

Industrial Estate - Rayong

Application : Static Load Test, NDT and
 Epoxy injection

Project Location : Rayong Province

Sub-Contractor : Freyssinet (Thailand) Ltd.

Project Commenced : 2012

Project Background :

The project required evaluation and diagnosis of cracks which existed in some precast structures of the project. The work included crack investigation of precast girders by UPV test and repair proposal for cracks that need to be repaired by epoxy injection. Subsequently, static load test was carried out to evaluate the effectiveness of the crack repair.

Project details :

Freyssinet surveyed, investigated and diagnosed the cracks. Freyssinet also performed crack injection repair method suitable for this project, as well as performed static load test for the client.
